PROFESSIONAL SUMMARY

I'm a results-driven, customer-focused, articulate and analytical Software Engineer who can think "out of the box". I specialize in information systems by designing, developing, and installing software solutions; specifically focusing on web based applications, both on the front end and back end. Strong in design and integration problem solving skills. Expert in HTML/CSS, JS, and CMS with database analysis and design. Skilled in developing business plans, requirements specifications, user documentation, and architectural systems research. Strong written and verbal communications.

SKILLS

AngularJS	RESTful API
JavaScript	Responsive Web Design
HTML5	User Interface
CSS3	User Experience
